

EconoWarm[®]

Radiant Panel Heater

Congratulations on choosing a WarmBuddy product!

Please read this user guide before using the product and keep it in a safe place for future reference.

USE AND APPLICATION

The EconoWarm Radiant Panel Heater is designed to warm the area directly around your feet and legs.

This low power heater uses less energy than an average light bulb. With running costs from R0.96 a day*, you are able to save on electricity by using the EconoWarm Panel Heater as a supplemental heating option and turning your room heating down or even off.

1. Unbox and unfold the panel heater
2. Ensure the heater is in an upright position and unfolded
3. Simply plug in and enjoy

EconoWarm is light and portable and can be used almost anywhere.

**Calculations based on Eskom rate of R1.50 p/kWh x 8 hrs x 80 Watts*

IMPORTANT NOTES / PRECAUTIONS

- Do not use flat or folded
- Do not place an object on the panel or cover with an object that may insulate the heated panel.
- Do not leave infants or people who are immobile or insensitive to heat to lie or sit near the panel for prolonged periods.
- Do not replace the cord. If the cord is damaged, the panel must be scrapped.
- Do not immerse in water. Brush off or clean with soapy water.
- Do not use the panel if it no longer heats. The panel is of a sealed construction and cannot be repaired.
- Connect this panel to a plug socket which is on a RCD protected (safety switch) circuit.
- The panel is not to be operational in the closed position. Ensure heater is in the open position when plugged in.
